

I feel that the FCC should disallow the financial institutions in Indiana and other areas from allowing them to phone us soliciting further services or business, if I want further services or business from any company I deal with I can contact them myself, if they have a new product or service they want to let customers know about they can include this info in with any billings or other mail we receive from them. Just because I elect to do business with a institution I feel does not give them the right to contact me by phone for any reason other than a problem with the service I am using them for.
